

White-label · Ready to launch · Fully customisable

# Cab Booking Management System

Launch your own ride-hailing business with a Rider App, Driver App and a powerful Admin Panel, all under your brand. Bookings, dispatch, live tracking, fares, payments and reports, built and delivered end-to-end.

Rider App

Driver App

Admin Panel

AI & Automation

# Everything you need to run a cab business

Whether you run a few taxis or a fleet of hundreds, this system replaces phone bookings, registers and guesswork with one connected platform. Riders book in seconds, the nearest driver gets the trip instantly and you see every ride, rupee and driver live from your dashboard.

## The challenge

- ✗ Bookings lost over phone calls and WhatsApp
- ✗ No live view of where drivers are
- ✗ Fare disputes and cash leakage
- ✗ Driver no-shows and idle time
- ✗ No reports to make decisions

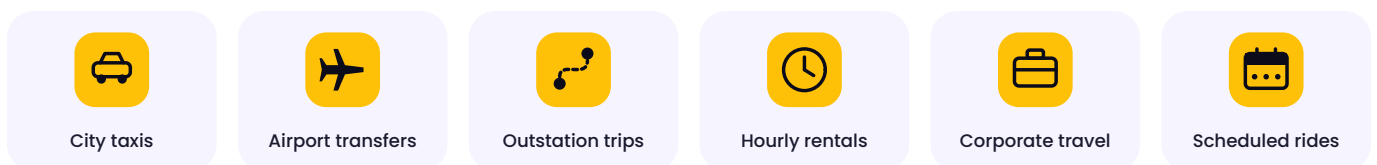

## With this system

- ✓ 24x7 instant bookings from the rider app
- ✓ Live GPS tracking of every car and trip
- ✓ Auto-calculated fares with digital payments
- ✓ Smart dispatch to the nearest available driver
- ✓ Real-time dashboards and downloadable reports

## ONE PLATFORM, THREE CONNECTED APPS

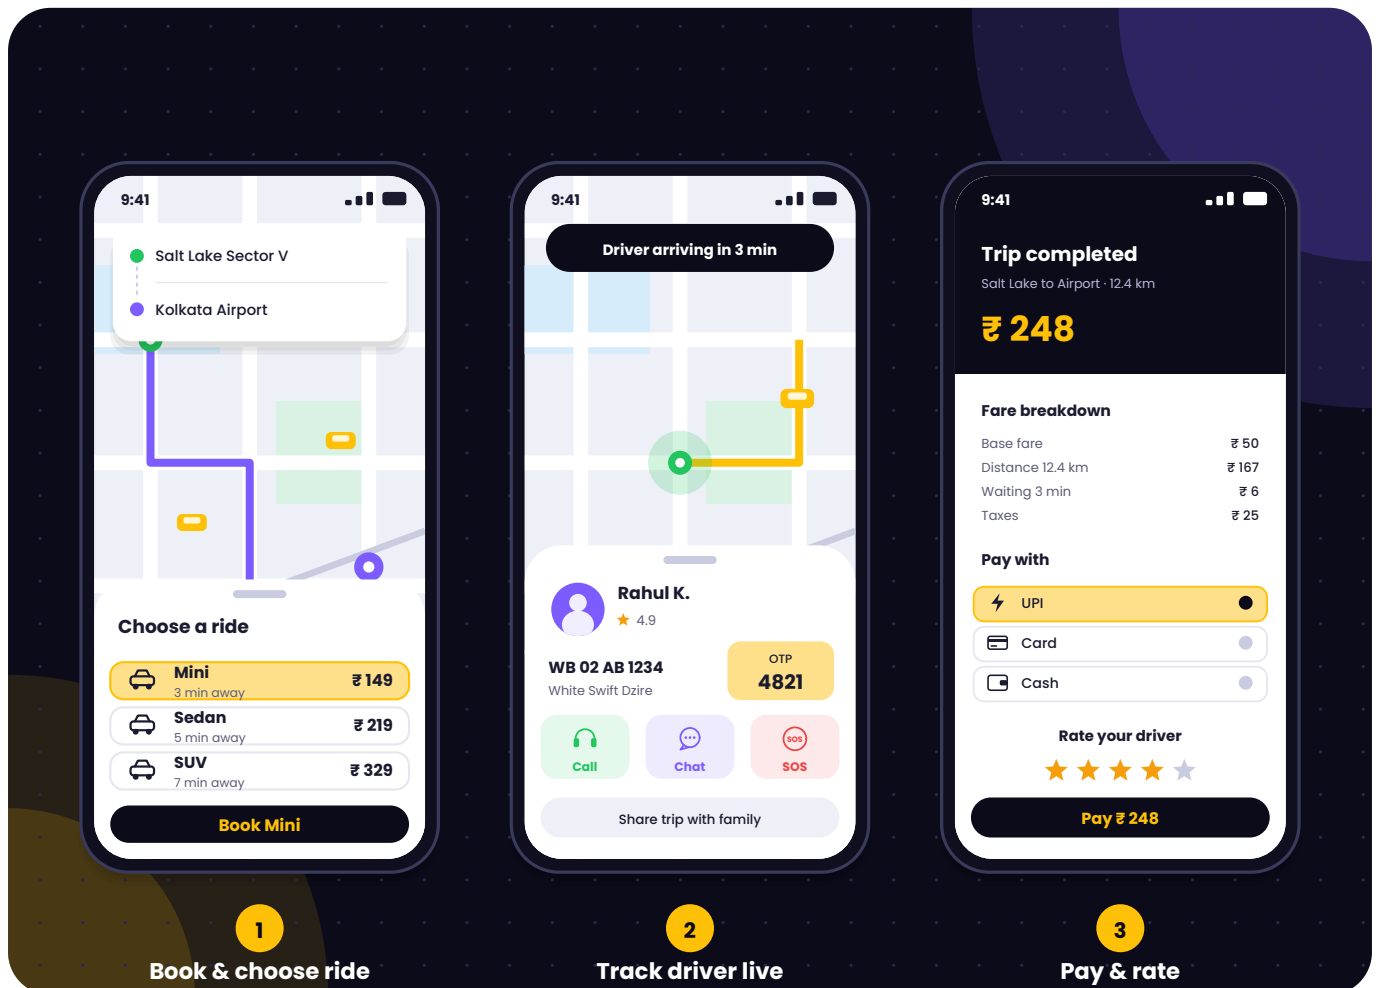

## BUILT FOR

# Book a ride in under 30 seconds

A clean, fast app your customers will love. Riders set pickup and drop, compare ride types with upfront fares, track the driver live and pay the way they prefer.

## Smart pickup & drop

Map search, saved places, current location and multiple stops.

## Upfront fare estimate

Riders see the price before booking, with no surprises.

## Live trip tracking

Watch the driver arrive and follow the trip on the map.

## Flexible payments

UPI, cards, wallet or cash, with automatic e-receipts.

## Ride now or schedule

Book instantly or schedule airport and outstation rides ahead.

## Safety first

OTP ride start, SOS button and live trip sharing with family.

## Offers & referrals

Promo codes, referral rewards and loyalty discounts.

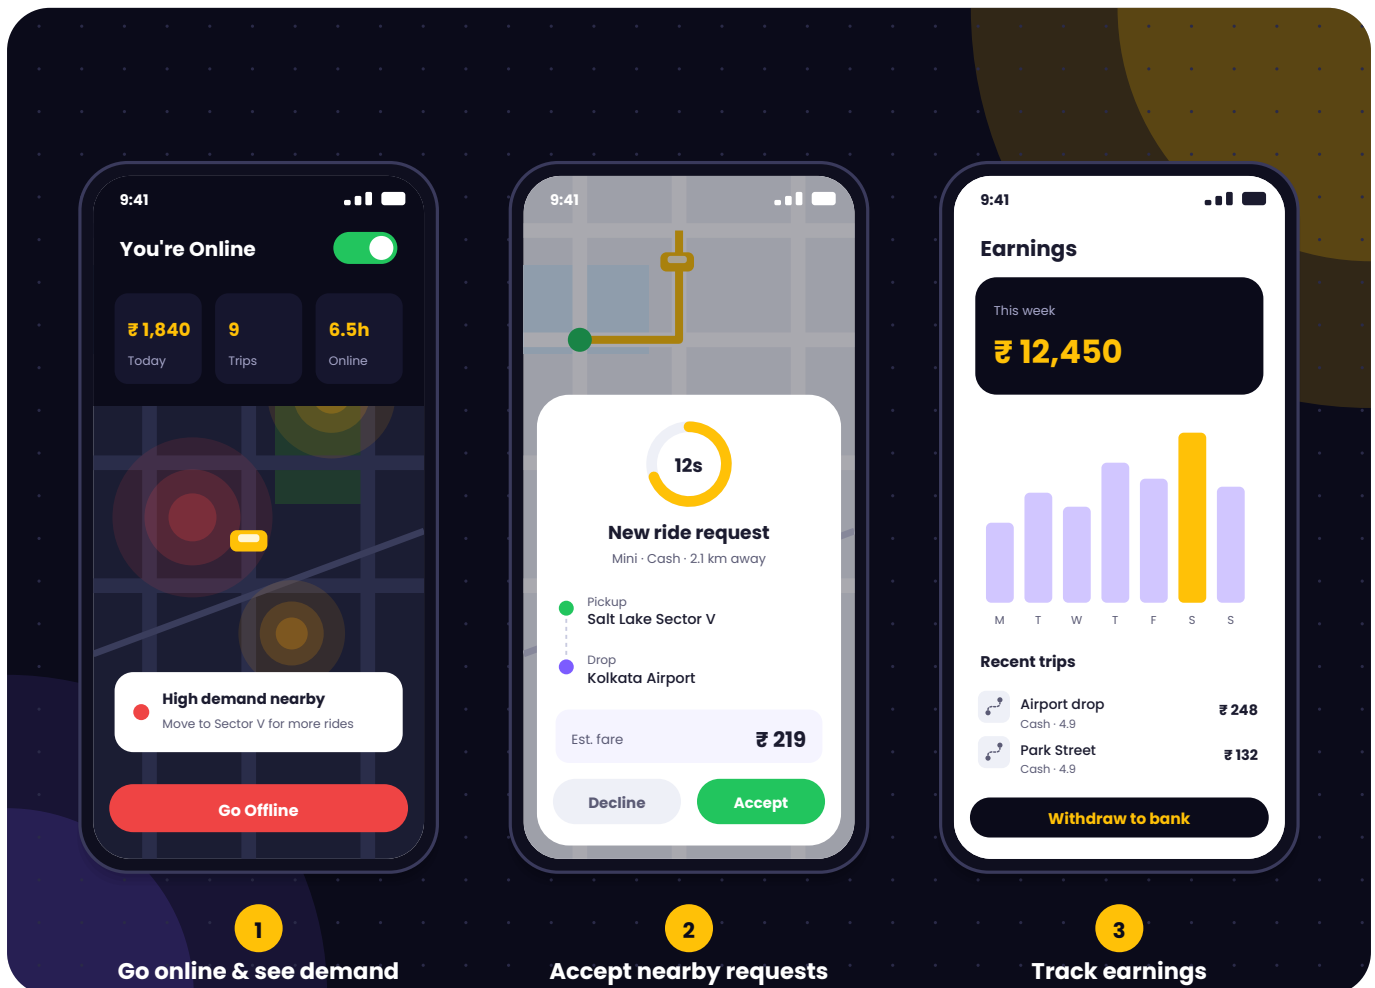

## Ratings & history

Rate drivers, view past trips and download invoices.

# Keep drivers busy, earning and on time

Drivers go online with a tap, get nearby trip requests instantly and navigate straight to the rider. Clear earnings and payouts keep them motivated and loyal to your platform.

## One-tap online / offline

Drivers control availability; only online drivers get trips.

## Instant ride requests

Nearby requests with pickup, drop, distance and fare preview.

## Built-in navigation

Turn-by-turn route to pickup and drop via Google Maps.

## OTP trip start

Trip starts only after the rider shares the correct OTP.

## Earnings & payouts

Daily and weekly earnings, commission view and bank withdrawals.

## Digital onboarding

Upload licence, RC, insurance and KYC for admin approval.

## Demand heatmap

See high-demand areas to reduce idle time and empty kilometres.

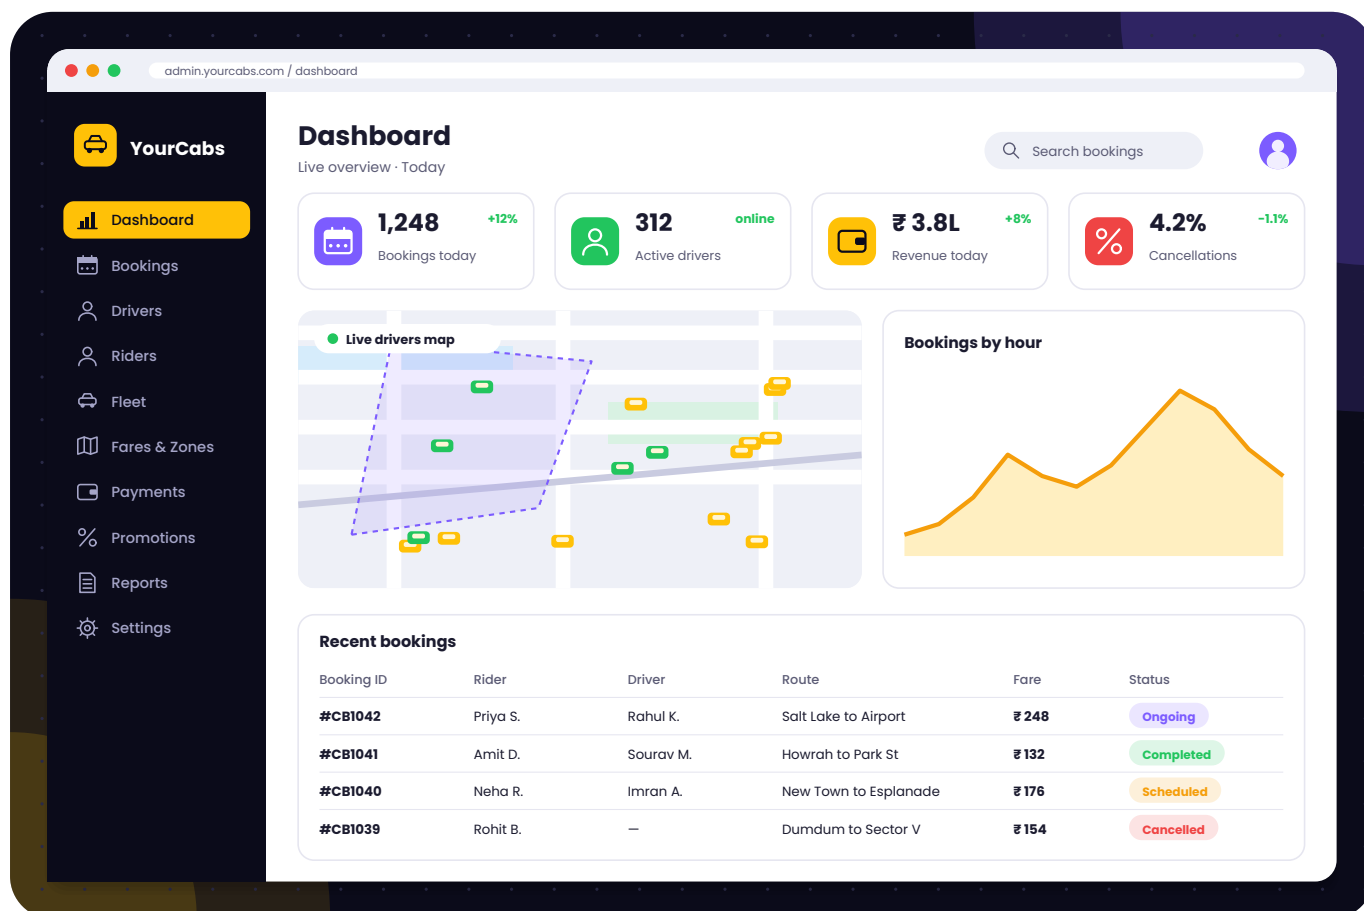

## Ratings & incentives

Ratings, trip targets and bonus incentives to boost quality.

# Your control room for the entire business

A powerful web dashboard to manage bookings, drivers, riders, fleet, fares and payments, with live visibility of every car on the road and role-based access for your team.

## Live dashboard

Bookings, revenue, active drivers and cancellations in real time.

## Booking management

Create manual bookings, assign or reassign drivers, handle cancellations.

## Driver management

Approve documents, set commission, block or reward drivers.

## Fares & zones

Base, per-km, per-minute, night and surge pricing by city or zone.

## Fleet & vehicle types

Manage cars, categories (Mini, Sedan, SUV) and vehicle documents.

## Payments & payouts

Track collections, commissions, refunds and driver settlements.

## Promotions

Create coupons, referral schemes and targeted push campaigns.

## Reports & exports

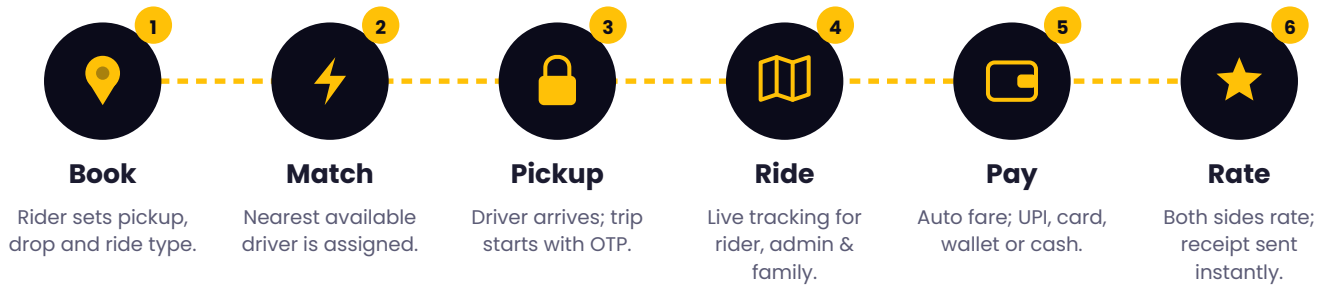

Daily, driver-wise and zone-wise reports with Excel/PDF export.

## Roles & permissions

Separate access for admins, dispatchers, accounts and support staff.

## From booking to rating in six simple steps

## Pricing that's fair, flexible and automatic

Set your own pricing rules from the admin panel. Every fare is calculated automatically and shown upfront to the rider, so there are no disputes and no cash leakage.

- 
**Zone & city based pricing**  
 Different rates for cities, zones and airports.
- 
**Time & distance**  
 Per-km and per-minute charges with minimum fare.
- 
**Peak & night surcharge**  
 Automatic multipliers for peak hours and late nights.
- 
**Packages**  
 Hourly rentals, outstation and fixed airport fares.
- 
**Taxes, tolls & discounts**  
 GST, toll add-ons, coupons and corporate rates.

**Fare breakdown**  
 Sedan · 12.4 km · 28 min

|                           |       |
|---------------------------|-------|
| Base fare                 | ₹ 60  |
| Distance (12.4 km × ₹ 14) | ₹ 174 |
| Ride time (28 min × ₹ 1)  | ₹ 28  |
| Peak hour (1.2×)          | ₹ 52  |
| Toll / parking            | ₹ 0   |
| GST (5%)                  | ₹ 16  |

**Total**
₹ 330

### Smart dispatch

Requests go to the nearest available driver first. If they don't accept within seconds, the trip moves to the next best driver automatically, so riders aren't kept waiting.

## Smarter operations with AI built in

Optional AI features that save your team time and help you grow, added where they genuinely help.

### WhatsApp & AI chat booking

Customers book, check status or get fare quotes by chatting on WhatsApp or your website.

### Demand insights

Spot busy areas and hours from trip history to position drivers better.

### AI support assistant

Answers common rider and driver questions 24x7 and escalates the rest.

### Auto reports & summaries

Daily business summaries sent to owners by email or WhatsApp.

## Safe rides build a trusted brand

### SOS emergency button

Instant alert to admin and emergency contacts with live location.

### OTP ride verification

Ensures the right rider gets into the right car.

### Verified drivers

Licence, RC, insurance and KYC checked before activation.

### Live trip sharing

Riders share their trip link with family and friends.

## Modern, scalable and secure

### FRONTEND

React.js · Next.js · TailwindCSS

### MOBILE

Responsive PWA · Android & iOS apps

### BACKEND

Node.js · Express.js · REST APIs · Socket.io

### DATABASE

MongoDB · MySQL · Firebase

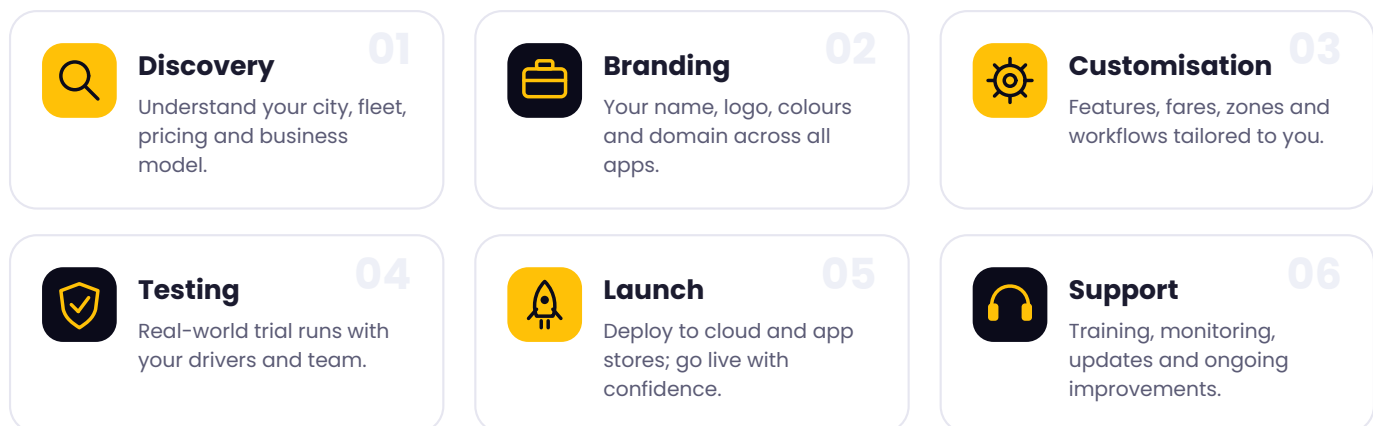

### INTEGRATIONS

Google Maps · Razorpay / UPI · SMS · WhatsApp API · FCM

### SECURITY & CLOUD

JWT auth · Role-based access · SSL · CI/CD · Cloud hosting
